

Bio

Amy Bultena is an artist and arts education director. She works as an artist, arts advocate, and as an arts education professional. She resides in Merced, California.

Statement

My work is about color and emotion; in my world these are the two most important things. These entities relate to how I see and feel everything. As someone living with mental illness; I experience color and emotion intensely and passionately. The purpose of my work is to both process the experience of color and emotion, and to share that experience with the viewer.
